

# PROPOSED CURRICULUM IN ZOOLOGY FOR B.Sc.,(UG)

## CBCS 2018 – 19 ONWARDS

### I SEMESTER

#### PAPER – I: NON-CHORDATA: PART – I

**-52 hrs**  
**-13hrs**  
**-06hrs**

##### **Unit: I - Animal Architecture and Protozoa:**

###### **a) Animal Architecture**

(To be taught citing suitable examples and keeping in view the evolutionary trends and significance)

- |   |          |
|---|----------|
| 1.1. <b>Body symmetry:</b> Definition and types – spherical, radial, biradial and bilateral symmetry  | - 01 hr  |
| 1.2. <b>Body organisation:</b> Hierarchical organisation of animal complexity – protoplasmic level, cellular level, tissue level and organ level of organisation. | - 01 hr  |
| 1.3. <b>Germ layers:</b> Definition, types - diploblastic condition (apparent and absolute) and triploblastic condition.  | - 01 hr  |
| 1.4. <b>Body coelom:</b> Definition, origin and types – acoelom, pseudocoelom, eucoelom (enterocoelom and schizocoelom).  | - 01 hr  |
| 1.5. <b>Metamerism:</b> Definition and types – pseudometamerism, true metamerism homonomous and heteronomous.   | - 02 hrs |

###### **b) Protozoa: The Animal-like Protista**

**-07 hrs**

- |   |          |
|---|----------|
| 1.6. General characters of the phylum up to classes with examples.  | - 01 hr  |
| 1.7. <b>Nutrition:</b> Holozoic, holophytic, saprozoic, mixotrophic and parasitic with an example for each.   | - 02 hrs |
| 1.8. <b>Locomotion:</b> Locomotory organelle – Pseudopodia, cilia and flagella. Modes of locomotion – Amoeboid movement (walking movement and sol-gel theory), flagellar and euglenoid movement, ciliary movement (Paddle stroke theory). | - 03 hrs |
| 1.9. <b>Reproduction:</b> Conjugation in <i>Paramoecium caudatum</i> , significance of conjugation.   | - 01 hr  |

##### **Unit: II – Porifera, Coelenterata and Ctenophora**

**- 14 hrs**

###### **a) Porifera: The Sponges – Nature's dead end**

**- 06 hrs**

- |  |          |
|--|----------|
| 2.1. General characters of the phylum up to classes with examples.                             | - 01 hr  |
| 2.2. <b>Sycon:</b> Morphology, microscopic structure of body wall and sexual reproduction.     | - 03 hrs |
| 2.3. <b>Canal System and its evolution:</b> Asconoid, syconoid, leuconoid and rhagonoid types. | - 02 hrs |

###### **b) Coelenterata and Ctenophora: The Radiate Animals**

**- 08 hrs**

- |  |          |
|--|----------|
| 2.4. General characters of the phylum Coelenterata up to classes with examples.    | - 01 hr  |
| 2.5. <b>Aurelia:</b> Morphology, reproduction and life cycle                       | - 03 hrs |
| 2.6. <b>Polymorphism:</b> Definition and significance. Example: <i>Halistema</i> . | - 01 hr  |
| 2.7. <b>Coral reefs:</b> Definition, types and theories of coral reef formation    | - 01 hr  |
| 2.8. <b>Ctenophores:</b> General organisation and affinities.                      | - 02 hrs |

### **Unit: III – Helminthes and Annelida**

	<b>10 hrs</b>
<b>a) Helminthes</b>	<b>- 05hrs</b>
3.1. General characters of the phylum Platyhelminthes up to classes with examples.	- 01 hr
3.2. <b>Planaria:</b> Externals, digestive system, excretory system and nervous system.	- 03 hrs
3.3. General characters of the phylum Nematoda with examples.	- 01 hr
<b>b) Annelida</b>	<b>- 05 hrs</b>
3.4. General characters of the phylum up to classes with examples	- 01 hr
3.5. <b>Earth worm (<i>Pheretima</i>)</b> - Morphology, digestive system, excretory system, reproductive system and development.	- 04 hrs

### **Unit: IV – Parasitology and Economic Importance of Annelids**

**-15 hrs**

<b>a) Parasitology:</b>	<b>-13 hrs</b>
4.1. i) Definition of parasitism and types with examples	- 01 hr
ii) Occurrence, disease caused, mode of transmission, life cycle and preventive measures of the following: <i>Entamoeba histolytica, Leishmania donovani, Fasciola hepatica, Taenia solium, Ascaris lumbricoides</i> and <i>Wuchereria bancrofti</i> .	- 10 hrs
iii) <b>Parasitic adaptations</b> - Flat worms and leech	- 02hrs
<b>b) Economic Importance of Annelida</b>	- 02hrs
4.2. Leech - Economic Importance Earthworm - Vermiculture and Vermicompost

11. Economic Zoology by Reena and Mattur(2006)

## I SEMESTER B.Sc., ZOOLOGY PRACTICAL

### NON-CHORDATA: PART – I

**15 Units**

- |  |          |
|--|----------|
| <b>1.</b> <b>Use of microscopes</b> – Simple, Compound, Oil immersion and 01 Unit Stereozoom   |          |
| <b>02.</b> Preparation and observation of plankton culture (also Protozoans).  | 01 Unit  |
| <b>03.</b> <b>Protozoa:</b> Study of permanent slides of <i>Amoeba</i> , <i>Euglena</i> , <i>Noctiluca</i> , <i>Paramoecium</i> , <i>Vorticella</i> and <i>Radiolarian - Foraminiferon ooze</i> ( <i>Elphidium</i> ) | 01 Unit  |
| <b>04.</b> <b>Porifera:</b> <i>Sycon</i> , <i>Euplectella</i> , <i>Hyalonema</i> , <i>Spongilla</i> and <i>Euspongia</i> . 01 Unit Permanent slides of T.S. of <i>Sycon</i> , spicules and gemmule.                  | 01 Unit  |
| <b>05.</b> <b>Coelenterata:</b> <i>Hydra</i> , T.S. of <i>Hydra</i> , <i>Obelia</i> colony, <i>Obelia</i> medusa, <i>Physalia</i> , <i>Aurelia</i> and <i>Ephyra</i> larva.  | 01Unit   |
| <b>06.</b> <b>Coelenterata and Ctenophora:</b> Corals– <i>Fungia</i> , <i>Corallium</i> , <i>Meandrina</i> , <i>Gorgia</i> and <i>Pennatula</i> , Ctenophora – <i>Pleurobrachia</i> W.M.                             | 01Unit   |
| <b>07.</b> <b>Helminthes:</b> <i>Planaria</i> , <i>Liver fluke</i> and <i>Tape worm</i> . <i>Ascaris</i> – Male, female and T.S of male and female <i>Ascaris</i> .  | 01Unit   |
| <b>08.</b> <b>Annelida:</b> Types of Earthworm species, T.S of earthworm, <i>Nereis</i> and <i>Heteronereis</i> , T.S of parapodium.   | 01Unit   |
| <b>09.</b> <b>Observation of systems/ organs in earthworm</b> – Nervous system, ovary and setae (Use of permanent slides, models or photographs).  | 02Units  |
| <b>10.</b> <b>Observation of systems/ organs in leech</b> – Digestive system, jaw and testicular nephridium (Use of permanent slides, models or photographs).  | 02 Units |
| <b>11.</b> <b>Parasitology:</b> Permanent slides of <i>Entamoeba</i> , <i>Leishmania</i> , life history stages of liver fluke (Miracidium, Redia, and Cercaria) and tape worm (Bladder worm).                        | 03Units  |

**SCHEME OF PRACTICAL EXAMINATION**  
**I SEMESTER B.Sc ZOOLOGY; NON-CHORDATA – I**

**Duration: 3 hrs.**

**Max. Marks: 35**

01	<b>Systematics:</b> Identify, classify and comment on A to E with labelled diagrams	20marks
02	<b>Project Report:</b> Economic Zoology/ Parasitology*	05 marks
03	<b>Observation of systems/organs:</b> Identify and describe the given system or organ ‘F’ with a neat labelled diagram. <b>Or</b> Mount and stain the plankton (or protozoan) culture given, identify and comment on any one specimen.	05 marks
04	<b>Class Records</b>	05 marks
	Total	35 marks

**Note: Project topics - Economic Zoology:** Corals and Coral reefs, Parasitic adaptations and economic importance of Leech, Vermiculture and vermicomposting.

**Parasitology:**

*Entamoeba histolitica, Leishmania donovani, Taenia solium, Fasciola hepatica, Ascaris lumbricoides, Wuchereria bancrofti*
