I. Read the following passage and answer the questions given below:

 $(5 \times 1 = 5)$ 

One of the most common injuries teenagers and adults experience is a sprained ankle. A sprain occurs when the ligaments of a joint are twisted and possibly torn. Ligaments are bands of stringy fibres that hold the bones of a joint in position. A sprain can occur from a sudden wrenching at the joint, or a stretching or tearing of the fibres of the ligaments. The injured area usually swells and becomes black and blue. Stepping off the sidewalk at the wrong angle or having one foot land in a hole while jogging can leave you rolling on the ground in agony with an ankle on fire! If you cannot walk without experiencing intense pain, you must seek medical help. If the pain is manageable, and you can walk, here are three words to help you remember how to treat yourself:

- i) Elevate
- ii) Cool
- iii) Bandage

As soon as there is injury to that ligament, there will be a certain amount of bleeding under the skin. Once the blood pools around the damaged blood vessels, inflammation and swelling occur. The pressure from the swelling results in additional stress and tenderness to the region. To minimize the degree of swelling, lie down as soon as possible and keep the ankle elevated so that it is actually higher than your heart. Next, to shrink the blood vessels and keep bleeding (hence bruising) to a minimum, apply a cold pack. After 20 minutes, take the pack off, wait half an hour, and then reapply. This can be done several times a day for a total of three days. Never leave a cold pack on for more than 20 minutes at a time. Finally, bandage the ankle. Be careful not to wind it too tightly: doing so can restrict blood flow and cause harm to the entire foot.

	Ans	wer the following questions:	
	1.	The main idea of the passage is	
		a) to describe sprains to the ligaments	
		b) to explain how to bandage head injuries.	
		c) to explain how to treat our fractured wrist.	
		d) to explain how the temperature of a wound is important.	
	2.	According to the passage, how is a sprain caused?	
	3.	In which cases, can the ankle be sprained according to the passage?	
	4.	According to the instructions, once the initial cold pack is removed, one has to was for 30 minutes and then reapply the ice. True/False.	ait

« Depuis 11 ans, mon mari et moi vivons à l'étranger. Nous n'avions pas de travail en France et ici, c'était plus facile. Maintenant, nous avons tous les deux un bon poste, mes parents vivent dans la même ville que nous, mais ça fait plusieurs années que j'ai envie de rentrer en France. Mon mari me rassure, me dit qu'un jour, nous retournerons y vivre, mais cet été, ça fera déjà 11 ans qu'on est ici. Je suis souvent triste et je me sens un peu trompée. Je me demande même parfois si je ne devrais pas rentrer seule en France. Et pourtant, j'aime mon mari, je lui ai crié des centaines de fois que j'avais besoin de retrouver ma culture, mes amis, mon pays... Je ne suis pas mal ici, mais j'ai seulement l'impression de ne pas vivre ce que je voudrais vraiment vivre, dans mon pays, c'est tout simple... »
